

Business Analytics

Let us guide you through an online demonstration of the Business Analytics module. [Click here.](#)

Objective

To provide an engine that creates a Business Intelligence layer allowing users to create multi-dimensional views of the SYSPRO data.

The value of SYSPRO Business Analytics

- Uses Microsoft OLAP and SQL technologies
- Scalable and open
- Easy wizard setup – no OLAP knowledge required
- Configurable analytics engine provided
- Customizable cubes for Financials, Distribution and Manufacturing
- SYSPRO database can be CISAM or SQL

Matching SYSPRO Business Analytics to Your Business

- Mini data warehouse without costs of traditional data warehouse
- Fully customizable views to suit your requirements
- Advanced customization through MS Analysis Services
- Add Business Rules through stored procedures
- Create logical breakups of underlying SQL tables and include breakups as dimensions
- Analyze data using any MS OLAP compliant viewer e.g. MS Excel and MS Data Analyzer or Business Intelligence viewers such as Proclarity and COGNOS
- MS SQL Server 2000
- MS SQL Analysis Server
- MS OLAP compliant viewer

Prerequisites

- MS SQL Server 2000
- MS SQL Analysis Server
- MS OLAP compliant viewer
